Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's Representative argues that based on Naiki et al., the laser printer starts to turn ON/OFF the laser sources based on a signal sent by a host computer, but not based on the internal clock generator. The examiner disagrees. The host computer only sends an instruction to the laser printer to start the printing operation and the laser sources are turned ON/OFF based on the input image data provided by the host computer, and the writing operation of each laser source is performed in synchronization with the internal clock generator.
